

## Trafinz Leadership Awards 2020

### Trafinz Sustainability Leadership Award

#### Puhinui Station Interchange - Auckland Transport/McConnell Dowell

A sustainable PT initiative within a highly developed residential area that is vehicle dependent with high levels of inequality and disadvantage. Puhinui Station provides much needed linkage to businesses and communities.

Puhinui Station Interchange shows that to achieve true sustainable infrastructure requires innovation, passion, a willingness to do things better and to adopt a whole-of-project approach. A commitment to sustainability is displayed throughout the project construction and use lifecycle.
